EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science , CGPA: 8.5/10

Sep. 2023 – May 2027

Bhopal, Madhya Pradesh

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL

Frontend: React, Next.js, HTML, CSS, JavaScript, TypeScript, Tailwind CSS, Redux/Context API State Management

Backend: Node.js, Express.js, Supabase, MongoDB, RESTful APIs, Mongoose ODM

Tools: Git, GitHub, AWS, Postman, IntelliJ IDEA, Jupyter Notebook, Vite

Libraries: NumPy, Pandas, Scikit-learn

EXPERIENCE

Front End Developer Intern

May 2026 – Jul. 2026

Manupama Technologies Pvt. Ltd.

Remote

- Developed 5+ highly responsive web application features using React.js and TypeScript, optimizing component trees and reducing redundant re-renders to boost frontend rendering speeds by 25%.
- Collaborated closely with an agile team of developers using Git/GitHub version control, identifying and resolving 30+ production UI bugs through cross-browser automated testing and systematic code debugging.
- Streamlined REST API integration and custom hooks management, optimizing data-fetching configurations to reduce client-side data loading latency by 18% across diverse screen breakpoints.
- Designed reusable UI primitives and utility layouts via Tailwind CSS, strictly standardizing responsive design frameworks to ensure full cross-platform visual uniformity across all production client views.

PROJECTS

MedBridge | React, TypeScript, Supabase, Tailwind CSS, Vite

2026

- Engineered a robust, scalable full-stack healthcare ecosystem systematically production-tested to sustain 200+ parallel concurrent database queries during sudden traffic surges without performance degradation.
- Implemented **8+ production-ready features** including custom Role-Based Access Control (RBAC), secure token-validated login systems, persistent real-time scheduling dashboards, and encrypted client-side medical file management.
- Leveraged Supabase backend services for rapid database transaction cycles, trimming data fetching times down to sub-120ms ranges while securing electronic records via row-level security policies.

NearbyNow | Next.js, React, TypeScript, Node.js, MongoDB, Tailwind CSS

2026

- Developed an optimized full-stack local commerce discovery engine, implementing composite database indexing and geolocal sorting rules to achieve precise query response times under 150ms.
- Implemented **10+ complete features** including instant asynchronous web notifications, user review moderation engines, structured inventory data lookups, and dedicated, real-time analytics merchant dashboards.
- Utilized Next.js server-side features to optimize asset payloads and initial loading parameters, successfully driving down script delivery weights by 14% across complex product directories.

EXTRACURRICULAR AND ACHIEVEMENTS

Hackathon and Coding -

- GRABHACK, Pre-Finalist: Achieved rank in the **Top 98 out of 4,500+ competing teams**, delivering a working full-stack prototype within a rigorous 36-hour sprint window.
- Competitive Programming: Successfully solved **over 300 algorithm problems** on LeetCode and **over 423 complex questions** on GeeksforGeeks, maintaining an active problem-solving streak focused on computational efficiency.

Leadership & Extracurricular Activities -

- Content Writer, EV Club: Formulated and authored 12+ deeply researched technical publications targeting emerging electric vehicle dynamics, gathering 1,000+ views.
- Graphic Designer, ED4U Club: Conceptualized and executed 25+ visual layouts, infographics, and digital brochures to drive multi-platform cybersecurity awareness campaigns.
